ABOUT THE GULF COAST VETERANS HEALTH CARE SYSTEM

Gulf Coast Veterans Health Care System consists of a Veterans Health Administration facility in Biloxi, Mississippi, with outpatient clinics in Mobile, Alabama; and Eglin, Pensacola and Panama City, Florida. The health care system serves the seven counties along the Mississippi Gulf Coast, the four counties along the Alabama Gulf Coast and the seven counties along the Florida Panhandle.

Gulf Coast Veterans Health Care System is a tertiary care facility. It is a teaching hospital, providing a full range of patient care services with state-of-the-art technology, education and research.

Gulf Coast Veterans Health Care System is privileged to serve over 70,000 Veterans. Comprehensive health care is provided through primary care, medicine, surgery, acute care/ICU, psychiatry, psychology, oncology, cardiology, dentistry, geriatrics, extended care, palliative/hospice care, physical rehabilitation and blind rehabilitation.

Gulf Coast Veterans Health Care System also provides support to readjustment counseling centers and VA National Cemeteries along the Gulf Coast.

PURPOSE

The purpose of the Gulf Coast Veterans Health Care System PGY1 pharmacy residency program is to build on Doctor of Pharmacy (Pharm.D.) education and outcomes to contribute to the development of clinical pharmacy specialists responsible for medication-related care of patients with a wide range of conditions, eligible for board certification, and eligible for postgraduate year two (PGY2) pharmacy residency training. The program prepares pharmacist clinicians for patient care positions in acute care and ambulatory care settings as well as positions in postgraduate year two (PGY2) residency or fellowship. Residents will be provided the opportunity to accelerate their growth beyond entry-level professional competence in patient-centered care, pharmacy operational services, and to further the development of leadership skills that can be applied to any practice setting.

There is ample opportunity to be involved in patient care, education, management and research. Residents are required to complete a research project, present it at a professional meeting and submit a manuscript suitable for publication by the end of the residency.

Residents also have the opportunity to participate in the Teaching Certificate Program offered through Auburn University's Harrison School of Pharmacy.

PGY1 MENTAL HEALTH FOCUS

The residency program is a PGY1 Pharmacy Practice residency with a mental health focus. It is a 12-month program consisting of a core longitudinal experience in Primary Care (Patient Aligned Care Team, PACT), Outpatient Mental Health, Rural and Underserved Interprofessional fellowship, Pharmacy Administration and Research. The longitudinal nature of this portion allows the resident the advantage of following patients over time to further enhance their learning experience. The resident will also rotate through Mental Health Residential Rehabilitation Treatment Program (MHR RTP), Outpatient Pharmacy, Inpatient Pharmacy, Adult Medicine and one elective.

Electives available include:

- Adult Medicine II
- Antimicrobial Stewardship
- Drug Information
- Pain Management and Opioid Stewardship
- Pharmacy Informatics
- Women's Health Primary Care
- Home Based Primary Care
- Geriatrics Community Living Center

*Other elective learning experiences may be developed based on resident interest and preceptor availability
