What is Academic Detailing?

1. A service-oriented outreach education for health care professionals by health care professionals; leveraging the one-on-one communication approach of pharmaceutical industry detailers combined with the evidence-based, non-commercial aims of academic groups, research, and development centers

2. A quality-oriented approach that helps providers make appropriate clinical decisions, ideally based on the best available safety, efficacy, and cost-effectiveness data

Why Use Academic Detailing?

- Provides access to balanced evidence-based information in an effective and impactful way
- Through dialogue with providers, academic detailing can improve patient care and health outcomes – aligning the interests of patients, providers, and payers
- Health care organizations are challenged with inefficient and ineffective use of therapies – academic detailing can help reduce this strain
- Many providers appreciate information on effective, safer, or cost-effective treatment options
- Proven method of providing evidence-based information in an impactful way

What is the Academic Detailing Process?

- In-person educational outreach
- Information is provided interactively so the detailer can meet the needs of the provider and truly understand their working environment, patient population, and resource availabilities
What is VA Academic Detailing Service (ADS)?

The Department of Veterans Affairs (VA) Pharmacy Benefits Management (PBM) Academic Detailing Service (ADS) is designed to provide a centralized matrix model for developing and supporting core elements of academic detailing (AD) programming across the Veterans Health Administration (VHA). In March 2015, the Undersecretary for Health issued a memorandum requiring implementation of AD programs throughout the VHA.

The mission of the ADS is to enhance Veteran outcomes by empowering clinicians and promoting the use of evidence-based treatments using the intervention of AD by clinical pharmacy specialists. AD is a service for clinicians, by clinicians, that provides individualized, face-to-face outreach, to encourage evidence-based decision making to improve Veteran health.
Goal of Academic Detailing

“To close the gap between the best available science and actual prescribing practice, so that each prescription is based only on the most current and accurate evidence about efficacy, safety, and cost-effectiveness.”

Dr. Jerry Avorn

File Name: Dep - Patient - Proven Treatments for MH Brochure
IB&P Number: IB 10-729; P96733
Academic detailing has launched a campaign designed to address opioid prescribing for acute pain from Emergency Department (ED) providers. Opioid-naive patients who receive more than three days’ supply of opioids or multiple opioid prescriptions are more likely to become chronic opioid users. ED providers are the front-line providers who may prescribe opioids for acute pain relief. As a result, they play a significant role in the potential for acute opioid therapy becoming chronic opioid therapy and placing Veterans at an increased risk of developing opioid use disorder. The OSI Dashboard was expanded to include ED prescribing information, called the ED Dashboard. This helps ED leadership to visualize opioid prescribing by ED providers and identify those that may benefit from seeing an academic detailer. Provider materials addressing acute pain were developed and a poster outlining possible treatment alternatives was created. Patient materials on acute pain treatment and opioid use disorder are also available to help with educating patients on changes in prescribing practices.

With detailing becoming more and more imperative, we can leverage technology to ensure that detailing occurs even in places that are rural, and hard to reach.

Virtual Video Connect (VVC) is a new electronic platform that will allow VA providers to establish virtual meetings with patients through ANY internet connected device (such as a smartphone, laptop, desktop, etc.) using an encrypted video stream.
