

Residency Description

The goal of this residency is to provide the necessary skills and experiences to develop a resident into an independent clinical pharmacist and provide a foundation for those pharmacists wishing to pursue a PGY2 residency.

The resident will design, monitor, and evaluate patient specific therapeutic regimens. In the Pharm PACT clinic, the resident will train as a clinical pharmacist managing multiple disease states: diabetes, hypertension, congestive heart failure, and hyperlipidemia. Additionally, the resident will be assigned a panel of anticoagulation patients to monitor and manage the entire year.

The program offers a competitive stipend, vacation and sick leave. Healthcare benefits are also available.

PGY-1 Pharmacy Residency

Bay Pines Sarasota Community Based Outpatient Clinic

**Come join our clinical
pharmacy team !**

UNITED STATES
DEPARTMENT OF VETERANS AFFAIRS

Requirements

- The applicant must possess a Doctor of Pharmacy Degree (PharmD) from an ACPE-accredited college.
- All residents will be required to successfully complete a state board examination. Licensure may be through any U.S. State Board of Pharmacy.
- It is preferred that Board Examination is completed prior to starting the residency, however there is some flexibility. You *must* be licensed by September.
- U.S. citizenship is required.
- The applicant must be registered with the American Society of Health-System Pharmacists' Matching Program.
- An on-site interview is required for selected applicants
- Minimum GPA: 3.0
- If selected, the resident must attend a 3 week orientation at Bay Pines VA Healthcare Center near St. Petersburg, Florida.

Primary Care is a fast growing specialty in health care today. While at Sarasota, the resident will experience a wide variety of clinic exposures including; anticoagulation, diabetes, hypertension, hyperlipidemia, and more. In these clinics, the resident will obtain direct patient care experience. The resident will develop as an independent practitioner and will design, monitor, and evaluate patient specific therapeutic regimens.
