# Postgraduate (PGY1) Pharmacy Residency Program

Focusing on the practice of  
pharmaceutical care in ambulatory care  
settings

**COLLEGE OF PHARMACY**

UNIVERSITY OF MINNESOTA

**Driven to Discover<sup>SM</sup>**

## Postgraduate Pharmacy Residency Program

*Preparing pharmacy practitioners for patient-centered practice*

The University of Minnesota Postgraduate Pharmacy Residency Program is a multi-site program that primarily focuses on the practice of pharmaceutical care in ambulatory care settings. Within the core learning experiences, we have a wide variety of opportunities available in our program to meet your individual learning preferences. We also offer emphasis opportunities in Rural Health and Pharmaceutical Care Leadership.

### Outcomes

The Postgraduate Pharmacy Residency Program is recognized nationally for innovation in residency education and for the quality practitioners we graduate. The program serves as a key source of leadership at the academic practice interface in Minnesota. Shared outcomes for residency participants include:

- Providing high quality, patient-centered comprehensive medication therapy services.
- Understanding key elements of practice management that support optimal service delivery.
- An ability to critically appraise drug literature and apply this to patient-specific care and organization-wide policies.
- Facilitating learning of peers and students with respect to patient-care delivery and clinical information.
- Conducting practice-based research.

### Core Learning

While residents complete most of their training at a specific host site, the program includes several activities designed to enhance learning and build collegiality among trainees. These activities include:

- Case Presentation
- Opportunity to participate in Foundations in Teaching course
- Faculty-directed pharmacotherapy sessions
- Pharmaceutical Care Grand Rounds
- Writing for a program-wide drug information newsletter
- Visits to peer resident sites
- Research project
- Attend at least one national pharmacy conference

### Testimonials

- “I love the diversity of the learning opportunities available through this program. There is a residency site available that will fit the desires of almost anyone interested in ambulatory care.”
- “By sharing our experiences with residents across the program, each resident’s experience is enriched beyond what individual sites can offer alone.”
- “The diversity of sites and experiences that residents can have creates a greater breadth in learning opportunities for clinical knowledge AND patient care skills.”

### BENEFITS

Competitive Stipend  
Health Insurance  
Paid Holidays  
Paid Vacation/  
Personal Days

### Emphasis Areas

#### Rural Health Emphasis

Rural pharmacists are frequently called upon to have expertise in all areas of medication use in a small community. Residency opportunities in our Rural Health Emphasis are one year in length and are all hosted by health systems that provide comprehensive health services to the communities they serve, including primary, long term and inpatient care. While the primary focus of the residents’ education is providing care to ambulatory patients, this emphasis area provides residents with experiences in all areas of medication use in healthcare facilities.

#### Pharmaceutical Care Leadership Emphasis

This 24-month residency experience is designed to prepare individuals to influence the advancement of pharmacy practice. The residency emphasizes the development of leadership skills within four domains: personal awareness and skills, practice advancement, teaching/mentoring, and professional advocacy. In addition to ambulatory care practice, experiences include teaching and instructional design at the College of Pharmacy and advocacy at the Minnesota legislature with the Minnesota Pharmacists Association. The second year of the program focuses on taking responsibility for establishing a new practice in a clinical setting that has not previously included a pharmacist.
