About Us

The Raymond G. Murphy VA Medical Center is a Level 1 tertiary referral center with a 24-hour Emergency Room located in Albuquerque, New Mexico, the heart of the Land of Enchantment. As a teaching institution, the medical center is affiliated with the University of New Mexico and the Central New Mexico Community College. The medical center is authorized to operate a total of 310 beds, which includes 32 acute psychiatric beds, three different residential treatment programs, and Community-based Outpatient Clinics (CBOCs) that operate in several locations throughout the state.

Our Philosophy

The purpose of this PGY2 Psychiatric Pharmacy Residency is to produce a highly-skilled practitioner able to provide mental health direct patient care in both inpatient and outpatient settings. The practitioner will be competent in patient-centered pharmaceutical care for acute care and ambulatory patient populations, which includes being knowledgeable in pharmacy operational services. The resident receiving a certificate will be prepared to accept any mental health patient care pharmacy position, especially within the Veterans Affairs Health Care System. The resident will also be prepared to serve as an adjunct faculty or pursue further training in psychiatric pharmacy practice or research.

“Dr. Campbell's approach to precepting is one of collaboration. I appreciate that his interaction and feedback allows residents to move forward and grow quickly. I believe far too often precepting can focus on minute details revolving around weaknesses of residents.”
