**Program Description**

The residency is designed to develop practitioners with a high level of skills required to manage patient care as an integral member of an interdisciplinary team. Residents will participate in established disease management clinics including: anticoagulation, diabetes, hypertension, dyslipidemia, tobacco cessation, and thyroid disorders. Residents will have learning experiences in the following areas: inpatient/outpatient staffing, ambulatory care, internal medicine, infectious disease, mental health, pain management, long-term care (Community Living Center), pharmacoconomics, and management. A teaching certificate is offered through South Dakota State University College of Pharmacy. In addition, residents will complete a research project and a service commitment.
