

HAMPTON VA MEDICAL CENTER PGY-1 PHARMACY RESIDENCY PROGRAM

Hampton VAMC, Historic Entrance

Our Facility

Located along the picturesque and historic banks of the Chesapeake Bay, the Hampton Veterans Affairs (VA) Medical Center (VAMC) is a 468-bed facility, serving more than 300,000 veterans living in eastern Virginia (VA) and northeastern North Carolina (NC). It is the fourth oldest facility in the VA healthcare system, established just after the Civil War, in 1870, as a national home for volunteer soldiers and sailors. Hampton VAMC is one of the fastest growing VA Medical Centers in the nation. It is also home to the largest Women's Health Program in VISN6. Women Veterans now comprise over 23% of enrolled Veterans at the Hampton VAMC.

As a teaching hospital providing a full range of patient care services, Hampton VAMC features state-of-the-art technology, education and research. The facility is a tertiary care, complexity Level 1c hospital providing comprehensive primary and specialty care in medicine, surgery, and psychiatry. In addition to our main facility in Hampton, we offer primary care and mental health services in four outpatient clinics located in Elizabeth City, NC, Chesapeake, VA, Portsmouth, VA and Virginia Beach, VA.

Practice Model

Hampton VAMC pharmacy services are available 24 hours a day, 365 days per year. The services are comprised of an inpatient and outpatient distribution pharmacy and also offers comprehensive clinical pharmacy services.

Clinical Pharmacy Specialists have a scope of practice and are active in providing pharmaceutical care services in Primary Care, Mental Health, Spinal Cord Injury, Internal Medicine, Anticoagulation, Home-Based Primary Care, Long-Term Care (Community Living Center), Hospice, Academic Detailing, Substance Abuse Residential Rehabilitation Treatment Program (SARRTP), and Women's Health.

Hampton VAMC is affiliated with Eastern Virginia Medical School and Virginia Commonwealth University (VCU) Health. Pharmacy school affiliations include Hampton University School of Pharmacy, VCU School of Pharmacy, and other pharmacy programs across the nation. More than 180 individual residents, interns, and students are trained at Hampton VAMC each year.

PGY-1 Program Overview

The Hampton VAMC PGY-1 Residency Program is accredited by the American Society of Health-System Pharmacists. The purpose of the program is to develop the resident's skills and competencies in providing patient-centered care in a broad range of clinical settings as a member of a multidisciplinary team.

The Hampton VAMC pharmacy resident has numerous learning opportunities managing the care of patients with multiple co-morbidities, psychosocial disorders, and complex social issues. In addition to patient care experiences, the resident will earn a teaching certificate through VCU School of Pharmacy, conduct a Quality Improvement project, participate in a medication use evaluation, and engage in daily operations of pharmacy services.

At the completion of the residency program, the resident will be prepared for an entry-level Clinical Pharmacy Specialist position or to continue training in a specialty PGY-2 residency program.
